

Mentoring for ESD-Leadership 2018

Project: sustainAbility – the PhD initiative

Project Responsible

Moritz Koch

Target Group

PhD students and the local community

Duration of the project

Indefinite. Current project (reusable food-container) approximately 6 months

Implementation Status

The group has been created and the symposium to set common goals has already been conducted. More ESD activities are planned.

Addressed SDGs

OBJECTIVES

- Educate PhD students about the importance of sustainability
- Conduct local sustainable development projects

MAIN ACTIVITIES

- Creating the group
- Organizing a sustainability symposium
- Introducing a reusable food-container system to the city of Tübingen

METHODOLOGICAL APPROACH

- Offering a platform for PhD students to meet and interact with PhD students from other disciplines and discuss sustainable development
- Also an option for students to get involved in a sustainable development project and learn more about it

IMPACT

What will change through your project

More future decision makers will learn about the importance of sustainable development. Additionally, a network of engaged students will be created. Finally, the implementation of sustainable projects will have a positive impact on the local community

Who & how many people will be reached

- Directly: 20 people
- Indirectly: 200 people
