

Mentoring for ESD-Leadership 2018

Project: Embedding ESD in Career Planning

OBJECTIVES

- Integrating values of sustainable development into career choices of students
- Building skills & competencies for the dynamic world

MAIN ACTIVITIES

A workshop series that aims to use the vehicle of career planning to:

- Develop content based on ESD values
- Convince schools to take on the programme
- Equip the internal team on ESD values and resource material
- Collate feedback and implement further changes

Project Responsible

Mansi Sharma

Target Group

Age:
13 to 17 years of age

School Type:

Private and unaided urban English-medium schools in India

Duration of the project

Pilot phase – 6 months, ongoing

METHODOLOGICAL APPROACH

Organising class interventions or workshops for students in school for them to reflect, realize and act around principles of sustainability while making personal decisions on careers.

IMPACT

Who & how many people will be reached

Teachers, School Students and Parents;
900 students in 3 schools in the pilot phase.
This would increase to 60+ schools by the next academic year.

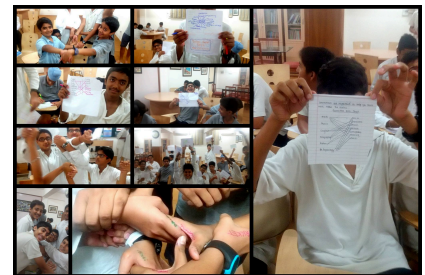

What will change through the project

Changing a mindset that career decisions are purely individualistic to that of collaboration, creating meaning, and leaving a lasting impact on the world with one's choices.

Implementation Status

Ongoing Implementation -
Pilot programmes at schools

Addressed SDGs

On behalf of

Federal Ministry
for Economic Cooperation
and Development
