

Mentoring for ESD-Leadership 2018

Project: Anaadi Sustainability Awareness for the Young

OBJECTIVES

- Creating awareness about sustainability among school children
- Sensitising students to ecological issues
- Helping young people to analyse the problem space and propose SMART solutions using management tools

MAIN ACTIVITIES

- Introduction to the SDGs to set the context
- Value-based stories to highlight leadership qualities and the desired attitude to create a sustainable future
- Self-reflection using meditation for the children to reflect on their thoughts on sustainability and putting the same to use for a sustainable future
- Group activities in form of team work on case-studies dealing with ecological issues
- Presentation of the solutions proposed by the teams

METHODOLOGICAL APPROACH

- Blend of lectures, discussions and hands-on group activities with an immersive and experiential content
- Workshops in several educational institutions for young people
- Drawing up a plan to implement the explored solutions by the participants

IMPACT

Who & how many people will be reached

- Directly: 1266 students and 52 teachers from 21 educational institutions

What will change through the project

The vision that children set for themselves at this right age will flow as beneficial actions in the future

Project Responsible

Prajna Cauvery Kotera Pooviah
