

Project Responsible

Anhai Martínez Encinas

Target Group

People involved in education, promoters of educational projects, institutions and networks that promote environmental education, families, children and the youth

Duration of the project

10 years

Implementation Status

Project commenced 6 years ago; Current phase calls for a national gathering of education for life and peace to create a network and a new working structure

Addressed SDGs

OBJECTIVES

- Creating sustainable bioregional learning communities
- Designing, sharing and strengthening learning processes and continuous training
- Influencing public policies, inter-institutional linkages, projects, networks and educational platforms

MAIN ACTIVITIES

- Creating linkages between networks, educational programs and schools
- Designing learning processes related to education for life and peace and sustainable development to introduce them in Mexican schools
- Designing internal trainings for a core group to strengthen our knowledge and our community of learning and practice
- Linking with institutions and government authorities like SEP and CONAFE
- Create events, workshops and trainings on education for life and peace and sustainable development

METHODOLOGICAL APPROACH

- Collective learning through community of learning practice
- Participative dialogue
- Sociocratic Circle-Organization Method (SCM)
- Dragon dreaming and agile learning

IMPACT

Who & how many people will be reached

- Directly: more than 200 people
- Indirectly: 500 people
