

MENTORING FOR ESD-LEADERSHIP PROGRAMME 2019

Project: Introducing Climate Sensitive Education in Government Schools

Project Responsible

Asha Verma

Target Group

School teachers (class 6-10)
Students (class 6-10)

Duration of Project

April 2019 – December 2019

Current Status

Implementation phase

Adressed SDGs

OBJECTIVES

- To develop an understanding on the issue of climate change.
- To encourage the process of critical thinking on the role everyone can play to combat climate change.
- To introduce the process of climate change mitigation and resilient planning at the school and individual level.

MAIN ACTIVITIES

- Develop teacher's training module
- Curriculum review and recommendations
- Module on climate change
- Safe Saturday Initiative

(PEDAGOGICAL) APPROACH

- Review existing school curriculum for climate relevant topics.
- Preparation of climate change education module in alignment with curriculum review to support classroom teaching of the topic.
- School level climate adaptation planning framework for climate actions.

CAPACITY BUILDING

How many people are reached?

Directly:
100 teachers

Indirectly:
500 pupils and 10 schools

What is the most important change you achieve through building capacity?

Development of climate leadership at the school level for instilling climate sensitive planning at the early learning stages of school children.
