

MENTORING FOR ESD-LEADERSHIP PROGRAMME 2019

Project: Green Urban Spaces Network

OBJECTIVES

- The recovery of green areas of the Lomas del Valle Residential.
- Spreading out the sustainable community activities that will be performed in this residential area.
- Creating awareness and training for sustainability through workshops, the generation of work networks and collective cooperation by residents.

MAIN ACTIVITIES

- “My IMPACT on Earth” workshop
- “Sprouted at home” workshop
- “Homemade spice rack” workshop

(PEDAGOGICAL) APPROACH

- Community-based co-designing of solutions.
- Reflection on practices and learning outcomes.

CAPACITY BUILDING

How many people are reached?

Directly:
10 (LMV neighbours group)

Indirectly:
250 residents

What is the most important change you achieve through building capacity?

Increased interest on the part of residents and users of the green area to preserve and care for the place, in addition to having a more sustainable awareness and lifestyle.

Project Responsible

Amanda Brown
