

MENTORING FOR ESD-LEADERSHIP PROGRAMME 2019

Project: Breaking Barriers for Education for Sustainable Development Through Citizen Science

OBJECTIVE

- Educate communities and learners within the KwaZulu-Natal Province about environmental management and sustainability within the next five years (2019-2024).

MAIN ACTIVITIES

- Review the SEEP programme.
- Rope in new stakeholders and train them (local schools as multipliers in the area).
- Fortify communication with community leadership.
- Develop a district forum to address its challenges.
- Recruitment of new schools into SEEP.
- Identify and train facilitators for the project roll-out.

(PEDAGOGICAL) APPROACH

- Citizen science approach
- Schools' Environmental Education Programme (SEEP)

CAPACITY BUILDING

How many people are reached?

Directly:
60 teachers,
80 community members

Indirectly:
1.000 pupils,
800 community members

What is the most important change you achieve through building capacity?

Learners and educators understand that they can make change in their communities and take care of their natural resources.
