

MENTORING FOR ESD-LEADERSHIP PROGRAMME 2019

Project: Organic Farming for Poverty Alleviation

OBJECTIVES

- Establishing a community organic garden for poverty alleviation through training and empowering of community members.
- Teaching learners ESD, SDGs, climate change and organic farming for better lifestyles and better informed life-decisions.

MAIN ACTIVITIES

- Training and equipping on organic farming.
- Implementation and maintaining of garden.
- Training of other women in the community for own home-gardens (discipleship).
- Give lessons to learners on our programme on ESD, SDGs and Organic Farming.

(PEDAGOGICAL) APPROACH

- Kinaesthetic learning – implementation of garden (learning by doing).
- Programme learning and situation analysis – training and equipping.

CAPACITY BUILDING

How many people are reached?

Directly:
10 women
10 learners
1 elderly staff member

Indirectly:
144 learners
409 community members
10 staff members

What is the most important change you achieve through building capacity?

Change in parents' unemployment status;
change in community's attitude towards healthy lifestyle; poverty alleviation in an impoverished community.
